<b>Total liabilities</b>	<b>401.8</b>	<b>376.4</b>

## Skuld delivers strong third quarter result

The result for the third quarter of 2004 ended at USD 10.6 mill. This represents a doubling of the second quarter result and brings Skuld's contingency reserve to USD 92.2 mill. After this increase, reserves per gross tonnage equal USD 3.4.

During 2004, Skuld's own claims have seen two different developments. Frequency claims below USD 0.5 mill. have come down. At the same time, we have seen several larger claims in the area USD 1-5 mill. It is important to note that large claims by nature are volatile. We are confident that the intensified number of larger claims reflects ordinary variation, and does not constitute any new trend. Despite this claims development, the third quarter technical result is USD 4.7 mill.

For investments, the actively managed bond portfolios continued to outperform the benchmark, leaving acceptable fixed income returns in an unfavourable climate of increasing

interest rates. Simultaneously, equities experienced a major recovery, with the US in lead with a third quarter performance of 8.03%. The half year investment loss of USD 2.0 mill is thereby rectified by the strong third quarter equity return, leaving a net investment profit of USD 6.1 mill. after nine months, equivalent to a 2.37% total return on investments.

As a result of a solid operating performance, good capitalisation and a strong competitive position, Skuld has recently been upgraded by Standard & Poor's to BBB with a stable outlook. The full report can be found at Skuld's website [www.skuld.com](http://www.skuld.com).

Following a Board and Committee meeting in Shanghai, Skuld has announced a 7.5% general increase for owners' P&I and Defence business and a 10% general increase for charterers.

DOUGLAS JACOBSON  
President & CEO
